Team Overview

We are committed to delivering our project with **high quality, teamwork, and dedication.**

Our project will be a **full-stack web application developed** using the following technologies:

- **Frontend:** HTML, CSS, and JavaScript.
- **Backend:** ASP.NET

We will divide the work based on each team member's skill set to ensure fairness, efficiency, and consistent progress. We all agree that this project will be a valuable opportunity to strengthen our technical collaboration and teamwork.

Project Idea

Our project is a **Pharmacy Management and Medicine Checker System** designed to help patients and administrators manage medicines efficiently.

- **For patients:** the system allows users to browse and search for medicines, check their availability, read detailed information (usage, dosage, and side effects), and find suitable alternatives.
- **For admins:** the system enables pharmacy administrators to **add, update, and manage medicine details**, including prices, quantities, and descriptions through a secure dashboard.
- **Sales and Reports:** admins will also be able to **record and manage sales transactions**, view the **total purchases made by patients**, and generate **summary reports** to track pharmacy performance and income.

This project will simplify access to medical information, reduce prescription errors, and improve the connection between patients and pharmacies. It will also help pharmacy owners monitor sales activity and make data-driven decisions.

Team Strengths

Our team combines a variety of technical and communication skills. We have strong experience in **frontend design, backend development, database management, and documentation**. We also value punctuality, cooperation, and problem-solving. Every member is motivated to deliver excellent results and support each other throughout the project.

Workflow & Responsibilities

We aim to finish the project **two days before the official deadline**.

- **Team Leader:** Fady Emad
 - Responsible for organizing tasks, tracking progress, and submitting the final project.
- **Reviewers:** Mina Montaser and Pola Samy
 - Responsible for reviewing the documentation and deliverables before submission.
- **All Team Members:**
 - Contribute actively to discussions, coding, and testing.
 - Attend meetings and respect deadlines.
- **Communication Tool:** WhatsApp will be used for daily discussions and quick updates.

Team Communication Guidelines

Methods of Communication

- **Primary Platform:** WhatsApp (daily messages, coordination, quick discussions)
- **Secondary Platform:** Email (formal communication, sending large files, or official updates)
- **Emergency Contact:** Phone calls (for urgent matters)
- **Online Meetings:** Google Meet or Zoom (for weekly progress reviews or discussions)

Response Time

- **WhatsApp messages** → reply within 2–4 hours
- **Emails** → reply within 24 hours
- **Urgent calls** → respond immediately or as soon as possible

Division of Work

Tasks will be **divided fairly** according to **each member's skills and interests**:

- The **team leader (Fady)** will coordinate task assignments after consulting the group.
- Each member **will take responsibility** for their assigned task but can request help when needed.
- The team will hold weekly **online meetings** to review progress and redistribute work if necessary.

Submitting Assignments

- All parts of the project must be completed and shared in the team repository at least two days before the submission deadline.
- Reviewers (Mina and Pola) will check the quality, formatting, and completeness of the deliverables within 24 hours of submission.
- After approval, Fady (team leader) will finalize and submit the project through the official submission channel.
- If any corrections are needed, they must be completed one day before the official deadline.
